HOMES**

A Refined Tradition Since 1980

Anatomy of an Eco-Hip Home

Optional Solar panels

Radiant Barrier

Reduces the sun's heat in your attic

Strategically Used Engineered Wood

Engineered lumber is stronger, more consistent in quality and makes better use of the tree.

Mold-Resistant Drywall

Temple-Inland's ComlartGuard® is a mold and water resistant drywall, providing a healthy living environment.

Energy Efficient Windows

Low-E and Low-E² windows block the sun's damaging U.V. rays and keep the home comfortable year round.

Tankless Water Heater

Tankless Water Heaters provide end-less, on-demand hot water without using energy to heat water when it's not in use.

16 SEER High Efficiency Air Conditioner

Increased energy efficiency with a variable speed condenser and independent zones. It's also extremely quiet.

Dow Weathermate Plus Weatherproofing System

A waterproofing system is superior to conventional felt in preventing vapor and water transmittance.

R-19 Insulation

Improved energy efficiency and noise control.

2x6 Exterior Walls

Improves structural rigidity compared to 2x4 studs and reduces lumber usage.
